SUBJECT INDEX

Alloys *("Various" i.e. not listed elsewhere by name)*
Diffusion of chromium in nickel-base Ni–Cr–Fe alloys, T.-F. Chen, Y. Iijima, K.-I. Hirano and K. Yamauchi 169 (1989) 285
XPS study on the electronic structure of hydrided Ti–V, Ti–Nb and Ti–Mo alloys, K. Tanaka and H. Aoki 169 (1989) 299

Aluminium, Aluminium Alloys and Compounds
Radiation-induced segregation and precipitation in Al–Zn alloys, T. Ezawa and F.E. Fujita 169 (1989) 131
Hydrogen implantation effects in the subsurface layer of aluminum – Bubble pressure and surface modifications, K. Kamada 169 (1989) 141
Evolution of krypton precipitates in Kr-implanted aluminium, E. Yagi, I. Hashimoto and H. Yamaguchi 169 (1989) 158
Amplitude internal friction peaks associated with the interaction between dislocation kinks and solute atoms in aluminium, T.S. Kê 169 (1989) 275

Ceramics *("Various" i.e. not listed elsewhere by name)*
Calculations of collision cascades in oxide ceramics MgO and α-Al_2O_3, E. Iguchi, K. Otake, T. Yamamoto and H. Nishikawa 169 (1989) 55
On the development of low-activation materials for fusion reactors, M. Okada, T. Noda and F. Abe 169 (1989) 249
Joining of silicon carbide, S. Morozumi 169 (1989) 270
High-temperature deformation mechanism in substoichiometric titanium carbide – Correlation with carbon vacancy ordering, S. Tsurekawa, H. Kurishita and H. Yoshinaga 169 (1989) 291
Irradiation effects in $Ba_2YCu_3O_7$ superconductor, K. Shiraishi 169 (1989) 305

Cladding Materials
Achievement of world's best performance in Japanese LWR, through the successful development on fuels and materials, Y. Mishima 169 (1989) 317

Computer Calculations, including Modelling
Stochastic modeling of cascade damage – Collisional processes, K. Kitajima 169 (1989) 47
Calculations of collision cascades in oxide ceramics MgO and α-Al_2O_3, E. Iguchi, K. Otake, T. Yamamoto and H. Nishikawa 169 (1989) 55

Creep and Relaxation
Lifetime of Manet steel in load-cycling tests in vacuum at 20 and 550 °C, H. Ullmaier and W. Schmitz 169 (1989) 233

Crystallographic Properties
High-temperature deformation mechanism in substoichiometric titanium carbide – Correlation with carbon vacancy ordering, S. Tsurekawa, H. Kurishita and H. Yoshinaga 169 (1989) 291

Defects and Defect Structures
Present knowledge of point defects in pure metals, J. Koehler 169 (1989) 3
Relationship between c/a ratio and point defect properties in hcp metals, D.J. Oh and R.A. Johnson 169 (1989) 5
TDPAC study of lattice defects and solutes in cadmium and cadmium alloys, R. Hanada 169 (1989) 9
Point defects in superconductors, Y. Quéré and F. Rullier-Albenque 169 (1989) 19
Normal modes of dislocations and rate theory, R.D. Isaac and A.V. Granato 169 (1989) 24
The anisotropy and temperature dependence of the threshold for radiation damage in gold – Comparison with other fcc metals, M. Hohenstein, A. Seeger and W. Sigle 169 (1989) 33
Vacancy clustering in electron-irradiated FeNiCr austenitic alloys, D. Huguenin, P. Moser and F. Vanoni 169 (1989) 73
Radiation rate dependence of microstructure evolution, M. Kiritani 169 (1989) 89
Radiation-enhanced formation rate of Guinier–Preston zones in proton-irradiated Cu–12.4 at% Be, B. Kell and H. Wollenberger

0022-3115/89/$03.50 © Elsevier Science Publishers B.V.
(North-Holland)

169 (1989) 126
Evolution of krypton precipitates in Kr-implanted aluminium, E. Yagi, I. Hashimoto and H. Yamaguchi 169 (1989) 158
Amplitude internal friction peaks associated with the interaction between dislocation kinks and solute atoms in aluminium, T.S. Kê 169 (1989) 275
Electrical conductivity and defect structure of $(U, Pu)O_{2+x}$, K. Naito, T. Tsuji, T. Fujino and T. Yamashita 169 (1989) 329

Diffusion *(incl. Thermodiffusion)*
Diffusion of chromium in nickel-base Ni–Cr–Fe alloys, T.-F. Chen, Y. Iijima, K.-I. Hirano and K. Yamauchi 169 (1989) 285
A model for radial cesium transport in a fuel pellet, S. Imoto 169 (1989) 336

Electron Microscopy and Electron Probe Microanalysis
Irradiation-induced spinodal decomposition in alloys, K. Nakai and C. Kinoshita 169 (1989) 116
Evolution of krypton precipitates in Kr-implanted aluminium, E. Yagi, I. Hashimoto and H. Yamaguchi 169 (1989) 158

Experimental Techniques
Fracture toughness evaluation of fusion reactor structural steels at low temperatures by small punch tests, T. Misawa, S. Nagata, N. Aoki, J. Ishizaka and Y. Hamaguchi 169 (1989) 225

Fatigue and Fracture
Fracture toughness evaluation of fusion reactor structural steels at low temperatures by small punch tests, T. Misawa, S. Nagata, N. Aoki, J. Ishizaka and Y. Hamaguchi 169 (1989) 225
Lifetime of Manet steel in load-cycling tests in vacuum at 20 and 550 °C, H. Ullmaier and W. Schmitz 169 (1989) 233

Fission Products
A model for radial cesium transport in a fuel pellet, S. Imoto 169 (1989) 336

Fuels and Fuel Elements: Thermal Reactors
A model for radial cesium transport in a fuel pellet, S. Imoto 169 (1989) 336

Fusion Reactors: Surface Effects
Hydrogen implantation effects in the subsurface layer of aluminum – Bubble pressure and surface modifications, K. Kamada 169 (1989) 141
A study of helium trapping, bubble structures and helium migration in Type 316L stainless steel under helium implantation, P. Wang, Y. Li, J. Liu, G. Zhang, R. Ma, P. Zhu, C. Qiu and T. Xu 169 (1989) 167

Fusion Reactors: Structural Materials
Influence of 100 keV helium irradiation on tensile properties of pure iron and JFMS steel at low temperatures, Y. Nakamura, S. Kitajima and K. Shinohara 169 (1989) 185
Phenomenological theories on irradiation effects of steels, N. Igata 169 (1989) 209
Fracture behaviors of neutron-irradiated ferritic steels studied by the instrumented Charpy impact test, H. Yoshida, K. Miyata, M. Narui and H. Kayano 169 (1989) 217
Fracture toughness evaluation of fusion reactor structural steels at low temperatures by small punch tests, T. Misawa, S. Nagata, N. Aoki, J. Ishizaka and Y. Hamaguchi 169 (1989) 225
Lifetime of Manet steel in load-cycling tests in vacuum at 20 and 550 °C, H. Ullmaier and W. Schmitz 169 (1989) 233
Radiation damage of HFIR-irradiated candidate stainless steels for fusion applications, A. Hishinuma and S. Jitsukawa 169 (1989) 241
On the development of low-activation materials for fusion reactors, M. Okada, T. Noda and F. Abe 169 (1989) 249
Phase stability and high-temperature strengths of high manganese–chromium–iron base alloys as reduced radio-activation materials, Y. Hosoi, Y. Okazaki, N. Wade and K. Miyahara 169 (1989) 257
Cryogenic properties of new austenitic stainless steel for fusion reactor superconducting magnets, K. Nohara, M. Shimotomai and Y. Habu 169 (1989) 264

Gases *(excl. Tritium)* **in Metals, Alloys and Ceramics**
Evolution of krypton precipitates in Kr-implanted aluminium, E. Yagi, I. Hashimoto and H. Yamaguchi 169 (1989) 158
A study of helium trapping, bubble structures and helium migration in Type 316L stainless steel under helium implantation, P. Wang, Y. Li, J. Liu, G. Zhang, R. Ma, P. Zhu, C. Qiu and T. Xu 169 (1989) 167
Helium embrittlement in Fe–Ni–Cr austenitic alloys and ferritic MA 956 alloy, H. Shiraishi, N. Yamamoto and A. Hasegawa 169 (1989) 198

Glasses and Amorphous Materials
Structure and thermal stability of iron-silicate nuclear waste glasses, R. De Batist, P. Van Iseghem, E. De Grave and A.D. Stalios 169 (1989) 342

Hydrogen and Hydrides
Hydrogen implantation effects in the subsurface layer of aluminum – Bubble pressure and surface modifications, K. Kamada 169 (1989) 141
Effect of hydrogen on the microstructure, mechanical properties and phase transformations in austenitic steels, Y.Y. Li and Z.S. Xing 169 (1989) 151
Embrittlement of materials: Si(H) as a model system, J.W. Corbett, P. Deák, C. Ortiz-Rodriguez and L.C. Snyder 169 (1989) 179
XPS study on the electronic structure of hydrided Ti–V, Ti–Nb and Ti–Mo alloys, K. Tanaka and H. Aoki 169 (1989) 299

History of Nuclear Materials
Achievement of world's best performance in Japanese LWR, through the successful development on fuels and materials, Y. Mishima 169 (1989) 317

Internal Friction
Normal modes of dislocations and rate theory, R.D. Isaac and A.V. Granato 169 (1989) 24
Amplitude internal friction peaks associated with the interaction between dislocation kinks and solute atoms in aluminium, T.S. Kê 169 (1989) 275

Irradiation Effects *(excl. Swelling and Voids)*
TDPAC study of lattice defects and solutes in cadmium and cadmium alloys, R. Hanada 169 (1989) 9
Point defects in superconductors, Y. Quéré and F. Rullier-Albenque 169 (1989) 19
The anisotropy and temperature dependence of the threshold for radiation damage in gold – Comparison with other fcc metals, M. Hohenstein, A. Seeger and W. Sigle 169 (1989) 33
Stochastic modeling of cascade damage – Collisional processes, K. Kitajima 169 (1989) 47
Calculations of collision cascades in oxide ceramics MgO and α-Al_2O_3, E. Iguchi, K. Otake, T. Yamamoto and H. Nishikawa 169 (1989) 55
Electron irradiation hardening of magnesium and zinc single crystals at 4.2 K, T. Mifune, A. Urakami, A. Sato and M. Meshii 169 (1989) 64
Vacancy clustering in electron-irradiated FeNiCr austenitic alloys, D. Huguenin, P. Moser and F. Vanoni 169 (1989) 73
Radiation effects on compound formation in palladium-implanted silicon using a focused ion beam machine, S. Balakrishnan, K. Rajan and J.C. Corelli 169 (1989) 79
Radiation rate dependence of microstructure evolution, M. Kiritani 169 (1989) 89
Formation and stability of radiation-induced phases in neutron-irradiated austenitic and ferritic steels, P.J. Maziasz 169 (1989) 95
Irradiation-induced spinodal decomposition in alloys, K. Nakai and C. Kinoshita 169 (1989) 116
Radiation-enhanced formation rate of Guinier–Preston zones in proton-irradiated Cu–12.4 at% Be, B. Kell and H. Wollenberger 169 (1989) 126
Radiation-induced segregation and precipitation in Al–Zn alloys, T. Ezawa and F.E. Fujita 169 (1989) 131
Hydrogen implantation effects in the subsurface layer of aluminum – Bubble pressure and surface modifications, K. Kamada 169 (1989) 141
Evolution of krypton precipitates in Kr-implanted aluminium, E. Yagi, I. Hashimoto and H. Yamaguchi 169 (1989) 158
A study of helium trapping, bubble structures and helium migration in Type 316L stainless steel under helium implantation, P. Wang, Y. Li, J. Liu, G. Zhang, R. Ma, P. Zhu, C. Qiu and T. Xu 169 (1989) 167
Influence of 100 keV helium irradiation on tensile properties of pure iron and JFMS steel at low temperatures, Y. Nakamura, S. Kitajima and K. Shinohara 169 (1989) 185
Helium embrittlement in Fe–Ni–Cr austenitic alloys and ferritic MA 956 alloy, H. Shiraishi, N. Yamamoto and A. Hasegawa 169 (1989) 198
Phenomenological theories on irradiation effects of steels, N. Igata 169 (1989) 209
Fracture behaviors of neutron-irradiated ferritic steels studied by the instrumented Charpy impact test, H. Yoshida, K. Miyata, M. Narui and H. Kayano 169 (1989) 217
Radiation damage of HFIR-irradiated candidate stainless steels for fusion applications, A. Hishinuma and S. Jitsukawa 169 (1989) 241
On the development of low-activation materials for fusion reactors, M. Okada, T. Noda and F. Abe 169 (1989) 249
Irradiation effects in $Ba_2YCu_3O_7$ superconductor, K. Shiraishi 169 (1989) 305

Kinetics
Radiation rate dependence of microstructure evolution, M. Kiritani 169 (1989) 89

Mechanical Properties
Electron irradiation hardening of magnesium and zinc single crystals at 4.2 K, T. Mifune, A. Urakami, A. Sato and M. Meshii 169 (1989) 64
Effect of hydrogen on the microstructure, mechanical properties and phase transformations in austenitic steels, Y.Y. Li and Z.S. Xing 169 (1989) 151
Embrittlement of materials: Si(H) as a model system, J.W. Corbett, P. Deák, C. Ortiz-Rodriguez and L.C. Snyder 169 (1989) 179
Influence of 100 keV helium irradiation on tensile properties of pure iron and JFMS steel at low temperatures, Y. Nakamura, S. Kitajima and K. Shinohara 169 (1989) 185
Helium embrittlement in Fe–Ni–Cr austenitic alloys and ferritic MA 956 alloy, H. Shiraishi, N. Yamamoto and A. Hasegawa 169 (1989) 198
Phenomenological theories on irradiation effects of steels, N. Igata 169 (1989) 209
Fracture behaviors of neutron-irradiated ferritic steels studied by the instrumented Charpy impact test, H. Yoshida, K. Miyata, M. Narui and H. Kayano 169 (1989) 217
Fracture toughness evaluation of fusion reactor structural steels at low temperatures by small punch tests, T. Misawa, S. Nagata, N. Aoki, J. Ishizaka and Y. Hamaguchi 169 (1989) 225
Lifetime of Manet steel in load-cycling tests in vacuum at 20 and 550 °C, H. Ullmaier and W. Schmitz 169 (1989) 233
Radiation damage of HFIR-irradiated candidate stainless steels for fusion applications, A. Hishinuma and S. Jitsukawa 169 (1989) 241
Phase stability and high-temperature strengths of high manganese–chromium–iron base alloys as reduced radio-activation materials, Y. Hosoi, Y. Okazaki, N. Wade and K. Miyahara 169 (1989) 257
Cryogenic properties of new austenitic stainless steel for fusion reactor superconducting magnets, K. Nohara, M. Shimotomai and Y. Habu 169 (1989) 264
Joining of silicon carbide, S. Morozumi 169 (1989) 270
High-temperature deformation mechanism in substoichiometric titanium carbide – Correlation with carbon vacancy ordering, S. Tsurekawa, H. Kurishita and H. Yoshinaga 169 (1989) 291

Microstructure *(incl. Textures)*
Stochastic modeling of cascade damage – Collisional processes, K. Kitajima 169 (1989) 47
Radiation effects on compound formation in palladium-implanted silicon using a focused ion beam machine, S. Balakrishnan, K. Rajan and J.C. Corelli 169 (1989) 79
Radiation rate dependence of microstructure evolution, M. Kiritani 169 (1989) 89
Formation and stability of radiation-induced phases in neutron-irradiated austenitic and ferritic steels, P.J. Maziasz 169 (1989) 95
Irradiation-induced spinodal decomposition in alloys, K. Nakai and C. Kinoshita 169 (1989) 116
Radiation-enhanced formation rate of Guinier–Preston zones in proton-irradiated Cu–12.4 at% Be, B. Kell and H. Wollenberger 169 (1989) 126
Radiation-induced segregation and precipitation in Al–Zn alloys, T. Ezawa and F.E. Fujita 169 (1989) 131
A study of helium trapping, bubble structures and helium migration in Type 316L stainless steel under helium implantation, P. Wang, Y. Li, J. Liu, G. Zhang, R. Ma, P. Zhu, C. Qiu and T. Xu 169 (1989) 167

Nuclear Fuels and Elements *(general)*
Achievement of world's best performance in Japanese LWR, through the successful development on fuels and materials, Y. Mishima 169 (1989) 317

Phase Transformations
Formation and stability of radiation-induced phases in neutron-irradiated austenitic and ferritic steels, P.J. Maziasz 169 (1989) 95
Irradiation-induced spinodal decomposition in alloys, K. Nakai and C. Kinoshita 169 (1989) 116
Phase stability and high-temperature strengths of high manganese–chromium–iron base alloys as reduced radio-activation materials, Y. Hosoi, Y. Okazaki, N. Wade and K. Miyahara 169 (1989) 257

Physical Properties
Normal modes of dislocations and rate theory, R.D. Isaac and A.V. Granato 169 (1989) 24
Electrical conductivity and defect structure of $(U, Pu)O_{2+x}$, K. Naito, T. Tsuji, T. Fujino and T. Yamashita 169 (1989) 329

Plutonium, Plutonium Alloys and Compounds
Electrical conductivity and defect structure of $(U, Pu)O_{2+x}$, K. Naito, T. Tsuji, T. Fujino and T. Yamashita 169 (1989) 329

Safety – Nuclear Reactors
On the development of low-activation materials for fusion reactors, M. Okada, T. Noda and F. Abe 169 (1989) 249
Achievement of world's best performance in Japanese LWR, through the successful development on fuels and materials, Y. Mishima 169 (1989) 317

Steels
Vacancy clustering in electron-irradiated FeNiCr austenitic alloys, D. Huguenin, P. Moser and F. Vanoni 169 (1989) 73
Formation and stability of radiation-induced phases in neutron-irradiated austenitic and ferritic steels, P.J. Maziasz 169 (1989) 95
Effect of hydrogen on the microstructure, mechanical properties and phase transformations in austenitic steels, Y.Y. Li and Z.S. Xing 169 (1989) 151
A study of helium trapping, bubble structures and helium migration in Type 316L stainless steel under helium implantation, P. Wang, Y. Li, J. Liu, G. Zhang, R. Ma, P. Zhu, C. Qiu and T. Xu 169 (1989) 167
Helium embrittlement in Fe–Ni–Cr austenitic alloys and ferritic MA 956 alloy, H. Shiraishi, N. Yamamoto and A. Hasegawa 169 (1989) 198
Phenomenological theories on irradiation effects of steels, N. Igata 169 (1989) 209
Fracture behaviors of neutron-irradiated ferritic steels studied by the instrumented Charpy impact test, H. Yoshida, K. Miyata, M. Narui and H. Kayano 169 (1989) 217
Fracture toughness evaluation of fusion reactor structural steels at low temperatures by small punch tests, T. Misawa, S. Nagata, N. Aoki, J. Ishizaka and Y. Hamaguchi 169 (1989) 225
Lifetime of Manet steel in load-cycling tests in vacuum at 20 and 550 °C, H. Ullmaier and W. Schmitz 169 (1989) 233
Radiation damage of HFIR-irradiated candidate stainless steels for fusion applications, A. Hishinuma and S. Jitsukawa 169 (1989) 241
On the development of low-activation materials for fusion reactors, M. Okada, T. Noda and F. Abe 169 (1989) 249
Phase stability and high-temperature strengths of high manganese–chromium–iron base alloys as reduced radio-activation materials, Y. Hosoi, Y. Okazaki, N. Wade and K. Miyahara 169 (1989) 257
Cryogenic properties of new austenitic stainless steel for fusion reactor superconducting magnets, K. Nohara, M. Shimotomai and Y. Habu 169 (1989) 264

Structural Materials
Effect of hydrogen on the microstructure, mechanical properties and phase transformations in austenitic steels, Y.Y. Li and Z.S. Xing 169 (1989) 151
Helium embrittlement in Fe–Ni–Cr austenitic alloys and ferritic MA 956 alloy, H. Shiraishi, N. Yamamoto and A. Hasegawa 169 (1989) 198

Superconductors *(Radiation Effects)*
Point defects in superconductors, Y. Quéré and F. Rullier-Albenque 169 (1989) 19
Irradiation effects in $Ba_2YCu_3O_7$ superconductor, K. Shiraishi 169 (1989) 305

Swelling
Phenomenological theories on irradiation effects of steels, N. Igata 169 (1989) 209
Radiation damage of HFIR-irradiated candidate stainless steels for fusion applications, A. Hishinuma and S. Jitsukawa 169 (1989) 241

Uranium Ceramics
Electrical conductivity and defect structure of $(U, Pu)O_{2+x}$, K. Naito, T. Tsuji, T. Fujino and T. Yamashita 169 (1989) 329
A model for radial cesium transport in a fuel pellet, S. Imoto 169 (1989) 336

Void Formation
Phenomenological theories on irradiation effects of steels, N. Igata 169 (1989) 209
Radiation damage of HFIR-irradiated candidate stainless steels for fusion applications, A. Hishinuma and S. Jitsukawa 169 (1989) 241

Wastes *(Radioactive)*
On the development of low-activation materials for fusion reactors, M. Okada, T. Noda and F. Abe 169 (1989) 249
Structure and thermal stability of iron-silicate nuclear waste glasses, R. De Batist, P. Van Iseghem, E. De Grave and A.D. Stalios 169 (1989) 342

Zirconium, Zirconium Alloys and Compounds
Relationship between c/a ratio and point defect properties in hcp metals, D.J. Oh and R.A. Johnson 169 (1989) 5
